ALLOWANCE

1. This action is in response to Applicant's after-final arguments and affidavits filed on 8/15/2008. Claims 13 and 15-25 are presented for further examination.
2. After careful consideration of Applicant's arguments and the expert opinions provided in the affidavits, the §103 rejections of claims 13 and 15-25 are withdrawn. Claims 13 and 15-25 are allowed.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Claim 13 distinguishes itself over the prior art by delineating a system for remotely and automatically controlling by a management company maintenance of facilities by a maintenance company where the maintenance company has contractual performance obligations to the management company. The system is patentable because of the combination of the local monitoring units, the control means which enable a technician to notify the start and end times of his maintenance, means for measuring operation parameters and detecting an operation state, a transmission network, first and second computers connected to the local monitoring units through the transmission network, and where the first computer is available to the maintenance company and the second computer is available to the management company. The prior art does not teach these elements or their related functionality in the fashion presented in independent claim 13. Claims 15-25 are allowed due to their dependence on claim 13.

Art Unit: 2152

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
